Paste reviews — one per line, or separated by blank lines

Cust2024-001 — "The pasta was incredible but our waiter forgot our order twice."

Cust2024-002 — "Best pizza I've ever had! Will be back with the whole family."

Cust2024-003 — "I found a hair in my food. Manager barely apologized when I told the host."

Cust2024-004 — "The ambiance was a bit quiet for a Saturday night, but the food made up for it."

Cust2024-005 — "Food was okay, nothing special. Wouldn't go out of my way to return."

Cust2024-006 — "Nice place"

Cust2024-007 — "The ambiance was terrifyingly unsafe — exposed wiring right by our booth."

Cust2024-008 — "The wait was 45 minutes on a Tuesday night with half the tables empty."

Cust2024-009 — "Honestly, this restaurant killed my appetite. Cold food, colder service."

Cust2024-010 — "Our server was so attentive — genuinely some of the best service we've had all year."

10 reviews detected · minimum batch size is 10 (FR2)

This batch needs at least 10 reviews

FR2 requires a minimum batch size of 10 reviews so Copilot AI has enough signal to categorise reliably. You currently have 7 — add 3 more, or pull in additional reviews from a connected platform.

Reliability note

If Microsoft Copilot AI is temporarily unavailable, FreshTake automatically falls back to a secondary engineered prompt so your batch still processes — you'll see a small badge on the results screen if that happens (NFR — reliability).

Ready to submit?

Copilot AI returns the structured 5-column table for the whole batch in one pass — typically under 30 seconds for 10 reviews.

REVIEW	SENTIMENT ↑↓	ASPECT TAGS	PRIORITY ↑↓	SUGGESTED ACTION	1ST REPLY (DRAFT)
"The pasta was incredible but our waiter forgot our order twice." Cust2024-001 · Yelp · Jun 5	Positive Negative	Food Quality Service	High	Brief kitchen team on order-accuracy during peak service; follow up with guest directly.	"We're sorry to hear about the mix-up with your order — that's not the experience we want for you. We'll review our ticket-handling process with the team and would love to host you again with a complimentary appetizer 🌿"
"I found a hair in my food. The manager barely apologized when I told the host." Cust2024-003 · Google · Jun 5	Negative	Food Quality Service	High	Escalate to GM — potential health/safety concern, log incident report and contact guest within the hour.	"We are very sorry — this falls well short of our food-safety standards. We've shared this directly with our kitchen leadership and would like to make this right. Please allow us to cover your next visit and discuss this further with our GM."
"The ambiance was terrifyingly unsafe — exposed wiring right by our booth." Cust2024-007 · TripAdvisor · Jun 4	Negative	Ambiance	High	Escalate to facilities — inspect and repair exposed wiring near guest seating before next service.	"Thank you for flagging this — your safety is our top priority and we've alerted our facilities team to inspect that area immediately. We're sorry this affected your visit and would welcome the chance to host you again."
"Best pizza I've ever had! Will be back with the whole family." Cust2024-002 · Google · Jun 5	Positive	Food Overall Experience	Normal	Share with kitchen team as positive recognition; consider featuring in social proof.	"Thank you for your kind words! We can't wait to welcome you and the whole family back 🌿"
"Our server was so attentive — genuinely some of the best service we've had all year." Cust2024-010 · Yelp · Jun 6	Positive	Service	Normal	Recognize the server by name in next team huddle as a service excellence example.	"Thank you for your kind words! We can't wait to welcome you back 🌿 We'll be sure to pass this along to our team."
"The ambiance was a bit quiet for a Saturday night, but the food made up for it." Cust2024-004 · Google · Jun 4	Neutral	Ambiance Food Quality	Normal	Note for weekend ambiance review — consider music/lighting calibration on slower nights.	"Thanks so much for the feedback — we're glad the food hit the mark! We're always tuning the evening atmosphere and will take this on board."
"Food was okay, nothing special. Wouldn't go out of my way to return." Cust2024-005 · Yelp · Jun 3	Neutral	Food Quality Overall Experience	Normal	Improve seasoning consistency on main course dishes; revisit with kitchen lead this week.	"Thanks for taking the time to share this — we're working on improving consistency across our menu and would love another chance to impress you."
"Nice place" Cust2024-006 · Google · Jun 3 · validated edge case	Positive	Tags = N/A Too short for aspect detail — the model intentionally returns N/A rather than guessing (hallucination-avoidance, target 0% false tags).	Low	No action needed — log as a brief positive mention; optional thank-you reply.	"Thank you for the kind words — we're so glad you enjoyed your visit and hope to see you again soon! 🌿"
"The wait was 45 minutes on a Tuesday night with half the tables empty." Cust2024-008 · TripAdvisor · Jun 2	Negative	Service No literal "service" keyword — the model inferred this from wait-time context, not pattern-matching.	Normal	Review host-stand staffing and table-turn process for slower weeknights.	"We're sorry for the wait you experienced — that's not the pace we aim for, especially on a quieter night. We'll review our seating flow and would love to offer you a complimentary starter on your next visit."
"Honestly, this restaurant killed my appetite. Cold food, colder service." Cust2024-009 · Yelp · Jun 1	Negative Compare: "killer pasta" → Positive. Same root word "kill", opposite sentiment — context wins over keywords.	Food Quality Service	High	Brief kitchen + FOH leads jointly — recurring "cold food / cold service" pattern needs root-cause review.	"We're truly sorry your meal didn't meet expectations — cold food and service like this isn't who we are. We'll review our process with both teams and would love to offer you a complimentary main course to make it right."

Review detail — Cust2024-001

Batch #042 · Story 3 · FR9 — human approval required before any reply is sent

Back to results

How FreshTake handles short / ambiguous reviews

Reviews like Cust2024-006 ("Nice place" / "N/A") are too short to support specific aspect detail. Rather than guess, the engineered prompt intentionally returns Aspect Tags = N/A — this is the validated hallucination-avoidance behaviour the team targets at a 0% false-tag rate. See it in the results table →

ORIGINAL REVIEW

☆ Yelp · 2★

"The pasta was incredible but our waiter forgot our order twice. We had to flag someone down both times, and by the time the second dish came out, the first one was cold."

Customer ID

Cust2024-001

Source platform

Yelp

Location

Riverside

COPILOT AI CLASSIFICATION

Sentiment category

Positive

Negative

Mixed review — praises food quality, criticises service. FreshTake tags both rather than forcing a single label.

Aspect tags

Food Quality

Service

Priority

High

WHY THIS PRIORITY?

✓ A **Service** failure was repeated twice in one visit — core a pattern, not a one-off.

✓ Negative experience risks **Food Quality** — a guest worst undoing genuine praise for **Quality** winning back.

✓ Public, detailed complaint on Yelp — business-impact criteria flag this as visible and actionable within 24h.

Priority reflects business impact, not just sentiment polarity — compare to Cust2024-004 ("ambiance was a bit quiet" → Neutral/Normal) vs. Cust2024-007 ("ambiance was terrifyingly unsafe" → Negative/High): same aspect, very different severity.

SUGGESTED ACTION

Brief kitchen team on order-accuracy during peak service; follow up directly with this guest.

Send to action queue

1ST REPLY — AI DRAFT (EDITABLE)

Drafted by Copilot AI

Hi there — thank you for taking the time to share this, and we're so glad the pasta hit the spot! That said, we're sorry your order was missed twice; that's not the service we hold ourselves to. I've shared this with our floor team so we can tighten up order-accuracy during busy hours. We'd love the chance to make it right — please reach out and we'll have a complimentary appetizer waiting for your next visit. 🌿

416 / 1000

You can edit this draft freely — nothing sends until you approve it.

Regenerate draft

Approve & send

REPLY PATTERNS THE PROMPT FOLLOWS

Positive → gratitude + invite

"Thank you for your kind words! We can't wait to welcome you back 🌿"

Negative → apology + fix

"We're sorry to hear about your experience with [aspect]. We'll review our [process] and offer a complimentary [item]."

Neutral → acknowledge + improve

Acknowledgement + "we're working on [improvement]" — keeps the door open without overpromising.
